

Complete Solar-Based Mobile Power Solution for Work Trucks

An independent and self-contained solar/battery system in a work vehicle can power equipment and ensure your entire fleet will start every time you turn the key.

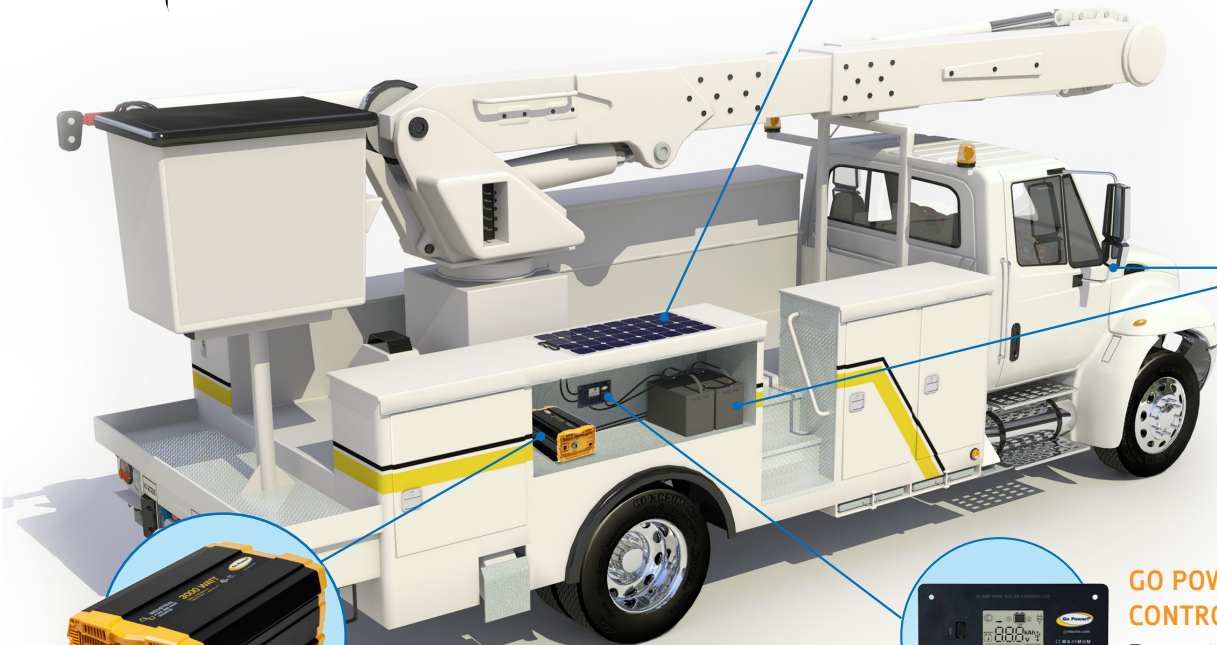

We tailor the system to your needs.

GO POWER! SOLAR FLEX™ KITS

The thin, lightweight, and flexible module contours to a truck cab, trailer body, or truck box, with adhesive or mechanical fastening options. High-efficiency, marine-grade solar cells will charge your batteries for years.

100 watt Solar Flex panel

DC LOADS

Operate safety lights or other DC-powered devices without having to idle the vehicle.

GO POWER! INVERTERS

Quality, heavy-duty inverters provide a safe and quiet supply of AC power.

GO POWER! SOLAR CONTROLLER

Prevents batteries from overcharging.

CHARGING POWER

Directly charge or run power tools or sensitive electronics, like cordless and corded tools, test equipment, laptops, and portable electronics.
